

## New Features:

### Program Schedule:

Link: <http://www.waycam.tv/schedule>

The new program schedule features a daily readout of the current day's programming. To view programming for other days of the week, simply click on the day you'd like to see at the top of the schedule readout.

For PSA's, tune to Comcast channel 99, Verizon channel 39

	School Committee April 27, 2015					5:00p
	School Committee April 27, 2015					9:30p

### Live Online Broadcasts:

Link: <http://www.waycam.tv/live>

Our new Live Streaming service allows you to watch exactly what is being broadcast on our channels, right from your computer, tablet, or smart phone. This includes regularly scheduled programs, as well as **LIVE** broadcasts.

### On-Demand:

Link: <http://www.waycam.tv/vod>

Our new on-demand system now has both the program schedule AND the live streaming built into it. So from the on-demand page, you are able to access both features, explained above, with an added bonus included.

The new interface features buttons, a search bar, and horizontal scrolling:

Here is a breakdown of each button:

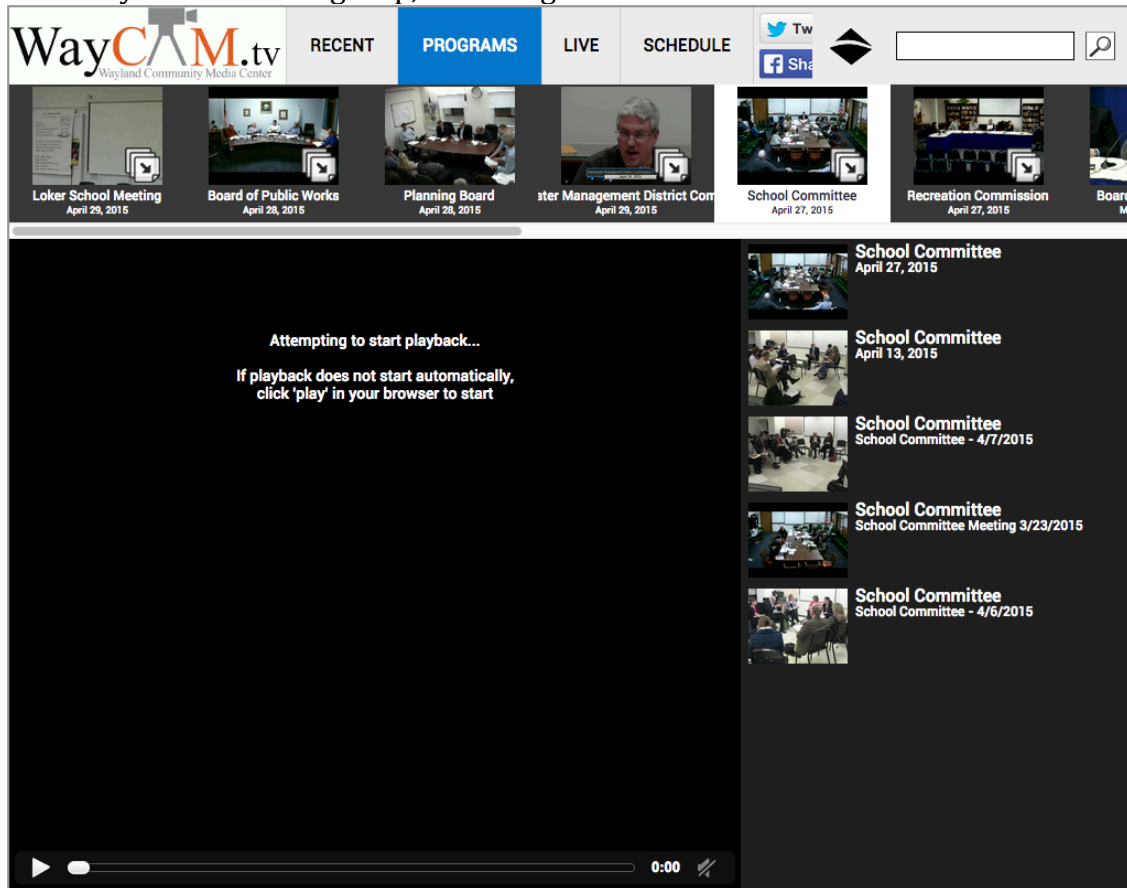

**Recent:** The recent tab lists each individual meeting, in the order that it is uploaded.

**Programs:** The programs tab sorts each video into a common grouping (for example, Board of Selectmen)

**Live:** Direct link to the Live Streaming Page

**Schedule:** Brings up the schedule read out on the right side of the interface

In both the “Recent” and “Programs” tabs, selecting a video will bring up all other videos by that board or group, on the right side of the screen:

From there, you can choose the specific meeting you want, or press play to view the selected meeting. The videos are not set to play automatically, so to play them, simply press play.

The LIVE page allows you to watch exactly what is being broadcast on TV, right from your computer, tablet, or smart phone. By clicking LIVE, you will open up an interface similar to the “Recent” or “Programs” page, but instead of programs, there will be channels. Simply choose the channel you want to watch (Public/Education, Government, or Community Bulletin Board) and press play.

The SCHEDULE page works similarly to the LIVE page. By clicking SCHEDULE, you will open up an interface similar to the “Recent” or “Programs” page, but instead of programs, there will be channels. Simply choose the channel you want to view the programming schedule for (Public/Education, Government, or Community Bulletin Board) and the current day’s schedule will appear on the right side of the screen.

To change what day is displayed, simply click on the day you’d like to see at the top of the schedule readout.

Added bonus for Government programs: All government programs can be played directly out of the schedule.

#### Direct Links to Meetings:

At the bottom of the page, there is a link that says “If you are experiencing issues with the above player, or are looking for a direct link to a video, please [click here.](#)” When you click that link, it will direct you to the video on demand page, outside of our website. Now, when you navigate to a meeting, the URL in the address bar will change, and you will be able to directly link to meetings that way.
